

Why Are Virginia Trees Your Best Choice?

Cooperative Efforts

The Virginia State Nurseries are proud to be a member of The Cooperative Tree Improvement Program at North Carolina State University. The mission of the Cooperative is to economically increase forest productivity through the genetic manipulation of loblolly pine populations. Enhanced productivity through breeding, selecting and deploying superior loblolly pine families is a major goal of the Cooperative.

Benefits of Virginia Tree Improvement Research

- Due to the cooperative sharing of genetic material, all of the best families that are suitable for Virginia are in our program.
- Selections have continuously placed extra emphasis on properties (straightness, crown characteristics) desirable for solid wood products.
- Some families from other provenances and cold hardiness zones either fail in Virginia or perform erratically.

Advantages of Our Genetically Improved Loblolly Pine

- Improved genetics for fast-growing, straight and disease-resistant seedlings.
- Increased growth and yield over unimproved seedlings: Based upon field trials through age six, Loblolly Pine Premium Open Pollinated (OP) provides a 50% gain or higher; Loblolly Pine Elite Open Pollinated (OP) provides a 60% gain or higher; Loblolly Pine Virginia's Best Open Pollinated (OP) provides a 65% gain or higher, and Loblolly Pine Control Pollinated (CP) provides a 90% gain or higher.
- Increased profits from improved growth.
- Our seedlings go completely dormant before shipping, and fully dormant seedlings withstand shipment and planting significantly better than non-dormant seedlings.
- We top clip our seedlings, which controls the shoot/root ratio contributing to excellent survival rates.
- Limited supply due to scarcity of seed.

Terms and Conditions

- It is recognized that under certain conditions VDOF and/or the buyer is unable to honor commitments for seedlings ordered. A full or partial refund will be granted when: VDOF is unable to fill the order due to the unavailability of quality seedlings, VDOF made an error when placing the order, VDOF personnel determined that the seedlings were damaged in transit, or VDOF personnel failed to fulfill written or implied contractual arrangements for planting or site preparation.
 - A refund will be granted with a \$20 service fee deducted when the landowner cancels the order within 30 days of placing the order.
 - A refund will be granted with a 50% restocking fee or \$20 service fee (whichever is higher) when the landowner cancels the order between 31 to 59 days after placing the order.
 - A refund will be granted with a 90% restocking fee or \$20 service fee (whichever is higher) when the landowner cancels the order after 60 days of placing the order and before January 15.
 - No refunds after February 1st.
- The Department of Forestry assumes no responsibility or liability for the planting of any tree seedlings, and, in the sale thereof, makes no warranties, expressed or implied, of merchantability or fitness for a particular purpose, and makes no warranties regarding the survival or rate of growth of any seedlings.
- Prices subject to change without notice.

Enabling Legislation

Title 10, Subtitle 2, Chapter 11, Section 10.1-1114 of the *Code of Virginia*. As a direct means of re-establishing forests on lands in Virginia, the Department of Forestry, hereafter referred to as the Department, grows tree seedlings for sale at cost to private and public landowners for foresting lands in Virginia.

Introduction

The Virginia Department of Forestry has been growing seedlings for Virginia landowners for more than 100 years. When you put your money in the ground in the form of seedlings, you need to start with the best stock available; stock suited for Virginia soils and climate. The cultural practices that we use in growing seedlings in our seedbeds are based on more than 60 years of research and experience in quality production.

In addition to the wide selection of bare-root seedlings, we also offer specialty seedling packs suitable for various wildlife habitats. Our seedlings are sold directly from the seedbed without replanting, and seedling age is indicated with 1-0, 2-0 and 3-0 (one-, two- and three-year-old).

This year we are also offering containerized longleaf pine seedlings. These seedlings must be picked up at the Garland Gray Forestry Center. Further information on these is located in this price guide.

Please visit our website where you will find a host of information about the species we offer, seedling sizes and view images of many species. While you're there, go ahead and place your order through our convenient web store.

This Seedling Price Guide provides pricing for more than 40 species of seedlings that have been grown at one of Virginia's two State Forestry Centers: the Augusta Forestry Center, near Waynesboro, and the Garland Gray Forestry Center near Petersburg. For other conservation/reforestation projects, contact your area forester. All orders, except for containerized loblolly pine, made from this brochure or on-line will be shipped from the Augusta Forestry Center via United Parcel Service delivery.

Garland Gray Forestry Center in Sussex County Offers Containerized Longleaf Pine

Many landowners across Virginia are starting to look for ways to accelerate early growth in their pine plantations and containerized seedlings may be a great way to do that. Container seedlings grow at a rapid pace when planted at the correct time. The best time to plant bareroot seedlings in Virginia is February to March because of cold weather. However, container seedlings are best planted in the fall and the overall planting window is much more extended. Pristine roots, larger seedling size, intact root ball and earlier planting all contribute to rapid growth.

**All container seedlings will be packaged by November 1 and will need to be picked up by mid-December.

To Place an Order

- Orders are accepted from Oct. to mid-April.
- Order on-line at www.BuyVaTrees.com; by mail using Form 12.2 Tree Seedling Catalog Order available at www.dof.virginia.gov, or by phone at (540) 363-7000.
- Payment in full is required at time of order.

Shipping and Handling

- Seedlings are available for pick-up or delivery from February 22 to April 29 depending on weather conditions.
- Pick-up is available at the Augusta Forestry Center free-of-charge.
- Shipping charge is 30% of the order total with a minimum shipping charge of \$20.
- Specify a desired shipment date when placing order.
- All UPS orders are shipped from the Augusta Forestry Center on Mondays, Tuesdays and Wednesdays.

Sales Tax

- Virginia sales tax is 5.3% of the order subtotal.

Tax Exempt

- Tax-exempt orders CANNOT be made on-line through the web store. For tax-exempt orders, mail a completed Form 12.2 Tree Seedling Catalog Order with a completed sales tax exemption form to the Augusta Forestry Center with payment. Sales tax exemption form must be completed in full, including tax exempt number. Blank sales tax exemption forms can be found at tax.virginia.gov.
